

ELIAS KROON

PROFILE

I am a solution-oriented and dedicated aspiring Software Engineer, set to graduate in the spring of 2025. My experience as an Aftersales Manager at one of Sweden's largest Elgiganten stores in Barkarby has given me a strong background in delivering results and working efficiently in a team. I have a strong technical interest and thrive on improving my technical skills while solving complex problems. This has been demonstrated throughout my education, where I have consistently achieved top grades in every course, strengthening both my theoretical and practical abilities. During my studies at Nackademin and my internship, I have also developed my teamwork skills in agile environments. This has made me highly motivated to apply my skills in real-world scenarios and contribute to the development of a team with strong cohesion and an open-minded culture.

SKILLS

- Programming in Python, JavaScript (Node.js), and Java.
- Automation and CI/CD using tools such as Ansible, Terraform, and GitHub Actions.
- Containerization with Docker, Docker Compose, and Kubernetes.
- Virtualization with KVM, QEMU, VirtualBox, and Vagrant.
- Database design and management, including MSSQL and Spanner.
- Scripting in Bash and PowerShell.
- Network administration.

OTHER SKILLS

- Team-oriented and experienced in working agile.
- Resilient under pressure, accustomed to multitasking.
- Quick learner and self-driven.
- Solution-oriented, with experience in business acumen and customer relations.

WORK EXPERIENCE

SITE RELIABILITY ENGINEER INTERN

Extenda Retail AB | 2024 December - Present

Currently, I am completing my internship with the Site Reliability Engineer team at Extenda Retail AB, where I have had the opportunity to learn from experienced colleagues and work with a range of technologies. I have developed skills in JavaScript, Node.js, Docker, Terraform, and WSL2, as well as implemented monitoring solutions using Prometheus and Grafana. Additionally, I have worked on building consistent Restful OpenAPI APIs to simplify monitoring and troubleshooting. Beyond that, I have deployed and debugged Cloud Run services and databases, as well as configured resource alerts, SLOs, and custom metrics in Google Cloud (GCP).

AFTERSALES MANAGER

Elgiganten AB | 2020 September - 2021 September

As an Aftersales Manager, I was responsible for store logistics and post-sales customer service. My tasks included logistics planning, handling escalated customer cases, training staff in customer service and internal procedures, and managing warranty claims with suppliers. This role required a strong focus on problem-solving, customer satisfaction, and ensuring efficient processes for both customers and internal teams.

TEMP. SERVICE COORDINATOR

Elgiganten AB | 2020 May - 2020 September

In my role as a Service Coordinator, I provided support within Elgiganten's back office. My work involved following up on service cases for company-owned stores and assisting with particularly complex cases.

EDUCATION

NACKADEMIN

DevOps Engineer | 2023 - 2025

During my studies at Nackademin, I have developed my knowledge in areas such as Python and Java, database design, Windows Server administration, and development and operations in Linux environments. I have worked with Configuration Management tools such as Ansible and built CI/CD solutions using GitHub Actions and Jenkins.

The DevOps engineer program has also given me practical experience in IT security, network administration, and virtualization with tools like KVM, Vagrant, and VirtualBox. I have extensively used Docker and explored Kubernetes and Terraform.

ADULT EDUCATION (KOMVUX)

2021 - 2023

Before starting my DevOps education, I prepared by taking courses in Python and JavaScript while working full-time at Elgiganten.

UPPLANDS-BRO GYMNASIUM

Technical Program – Information and Media Technology | Graduated: 2017

During my studies, I took courses in programming with Java and PHP, as well as web development.
