

ELIAS KROON

PROFILE

I am a solution-oriented and dedicated aspiring DevOps Engineer, set to graduate in the spring of 2025 with a specialization in cloud infrastructure, automation, and observability. I have a deep technical interest and a passion for using technology to solve complex, real-world problems—particularly those with meaningful impact.

My previous experience as an Aftersales Manager at one of Sweden's largest Elgiganten stores sharpened my ability to deliver results, lead with empathy, and work efficiently in fast-paced team environments. Throughout my education at Nackademin and my internship at Extenda Retail, I have built a strong foundation in tools like Docker, GitHub Actions, Terraform, and Google Cloud Platform. I've thrived in agile teams where collaboration, knowledge sharing, and continuous improvement are core values.

SKILLS

- Programming in Python, JavaScript (Node.js), and Java.
- Automation and CI/CD using tools such as Jenkins and GitHub Actions.
- Infrastructure as Code with Terraform
- Configuration as Code with Ansible
- Containerization with Docker, Docker Compose, and Kubernetes.
- Virtualization with KVM, QEMU, VirtualBox, and Vagrant.
- Database design and management, including MSSQL and Spanner.
- Scripting in Bash and PowerShell.
- Network administration.

WORK EXPERIENCE

SITE RELIABILITY ENGINEER (SRE) INTERN

Extenda Retail AB | 2024 December - 2025 May

- Developed automated tools to simplify and standardize development workflows, reducing manual effort and accelerating the onboarding of new microservices.
- Contributed to CI/CD pipelines using GitHub Actions to automate the build, testing, and deployment of Docker containers in development environments.
- Built reproducible local environments using Docker and Linux, improving developer experience and consistency across teams.
- Explored and implemented observability improvements, focusing on scalable cloud-native monitoring and logging solutions using tools like Prometheus and Grafana.
- Collaborated cross-functionally via Slack, GitHub, Jira, and Confluence, participating in daily standups to identify platform reliability and observability improvements.
- Gained experience in infrastructure automation and IaC principles through exploration of Terraform and cloud services (GCP).
- Practiced and advocated for strong SRE principles, including proactive monitoring, incident readiness, and measurable reliability goals (SLIs/SLOs).

Tech stack: JavaScript (Node.js), Docker, GCP, Grafana, Prometheus, REST, OpenAPI, Terraform, Python, Spanner DB, GitHub Actions.

OTHER SKILLS

- Team-oriented and experienced in working agile.
- Resilient under pressure, accustomed to multitasking.
- Quick learner and self-driven.
- Solution-oriented, with experience in business acumen and customer relations.

SALES/OPERATIONS

Elgiganten AB | 2021 September - Present

During my studies, I have worked part time as both a sales advisor and an operations staff member. My responsibilities included retaining customer satisfaction, ensuring frictionless store operations and conducting sales while providing complete solutions for customers.

AFTERSALES MANAGER

Elgiganten AB | 2020 September - 2021 September

As an Aftersales Manager, I was responsible for store logistics and post-sales customer service. My tasks included logistics planning, handling escalated customer cases, training staff in customer service and internal procedures, and managing warranty claims with suppliers. This role required a strong focus on problem-solving, customer satisfaction, and ensuring efficient processes for both customers and internal teams.

TEMP. SERVICE COORDINATOR

Elgiganten AB | 2020 May - 2020 September

In my role as a Service Coordinator, I provided support within Elgiganten's back office. My work involved following up on service cases for company-owned stores and assisting with particularly complex cases.

EDUCATION

NACKADEMIN

DevOps Engineer | 2023 - 2025

During my studies at Nackademin, I have developed my knowledge in areas such as Python and Java, database design, Windows Server administration, and development and operations in Linux environments. I have worked with Configuration Management tools such as Ansible and built CI/CD solutions using GitHub Actions and Jenkins. The DevOps engineer program has also given me practical experience in IT security, network administration, and virtualization with tools like KVM, Vagrant, and VirtualBox. I have extensively used Docker and explored Kubernetes and Terraform.

ADULT EDUCATION (KOMVUX)

2021 - 2023

Before starting my DevOps education, I prepared by taking courses in Python and JavaScript while working full-time at Elgiganten.

UPPLANDS-BRO GYMNASIUM

Technical Program – Information and Media Technology | Graduated: 2017

During my studies, I took courses in programming with Java and PHP, as well as web development.
